25X1

1. Since December 1952, there has been a considerable increase in the tonnage of coal carried by trains running in the direction of the USSR via Przemysl. The normal load of coal trains was 1,600 tons, as against approximately 2,600 tons now being transported by at least 30 percent of the trains.
2. All new freight cars (closed, flat, and coal cars) are being constructed in such a way that they can be utilized on Soviet-gauge tracks by a simple method of changing the wheel sets (zestawy kolowe).
